

Alberta Business Technology Firm Understands Link between Business and Technology

Businesses throughout Alberta are looking at new ways to leverage technology in today's new world economy. Microsoft Gold Partner and Small Business Specialist Bulletproof InfoTech raises the bar on Microsoft Office deployments geared to help business increase efficiencies and profits.

Calgary AB - 24 April 2009 - Bulletproof InfoTech, a Microsoft Gold Partner and Small Business Specialist based in Red Deer and Calgary has achieved a new level of certification as a member of the Microsoft Partner Program. Competencies with Microsoft technologies are strategic ways to measure how Microsoft Partners are working with solutions and services offered by Microsoft.

Bulletproof InfoTech hits this new milestone with Microsoft by achieving their third competency. The Information Worker competency certifies Bulletproof InfoTech to assist businesses throughout Calgary, Red Deer and Southern Alberta with a wide range of solutions. Microsoft IW solutions have a proven record of accomplishment. Increasing productivity, enhancing communications between co-workers, clients and vendors, producing professional presentations across the globe and helping business understand critical indicators in their business. These include finances, operating margins, return on investment and many other business related challenges, Microsoft Office solutions maintain this advantage of other low cost or free solutions.

Combined with the need for great technology, businesses today are turning to Microsoft Partners as their Trusted IT Business Advisor to assist in the workflow management, business intelligence and process management. The Microsoft IW competency now positions Bulletproof to provide critical business solutions using the right technology solution accomplishing a positive effect in business today.

The Office Deployment specialization is built on the Microsoft Office 2007 suite of productivity tools. Microsoft Word, Excel, PowerPoint and Outlook have been staples in many businesses for the past several years. Many businesses are looking at new tools including InfoPath, OneNote and Office Communicator and the integration with the entire suite of products to take their business to the next level. Microsoft Office 2007 continues to play an important role in business, especially here in Alberta.

Today's information worker is no longer tied to their desktop and the need for reliable technology systems built on the Microsoft Information Worker solutions combined with network solutions built on Small Business Server 2008, mobility and security has never been more important. Business today lean on technology to achieve goals, increase profits and remain competitive.

Bulletproof's certification with IW and Office Deployment will now provide business with the right solution to match the needs of today's small business in Alberta..
