

CLIENT INFORMATION

Sinneave Family Foundation (SFF), Calgary, Alberta, Canada. Seeking to improve the quality of life for those living with autism.

SMALL BUSINESS SERVER

Windows Small Business Server 2008 provides a centralized, secure and scalable solution for Small Business. Communication throughout the organization leveraging Windows SharePoint Services, Microsoft Exchange 2007 and Microsoft Office 2007.

VIRTUALIZATION

Virtualization of Windows Small Business Server 2008 provides a "peace of mind" solution. All business models can immediately benefit from SBS 2008 in a virtual environment. Using Microsoft Hyper-V all network services are centralized on leading hardware from DELL Canada. This solution offers a green solution for business combined with a disaster recovery solution that fits the budget of small business. Application virtualization with Windows Terminal Services provides a cost effective desktop management solution.

Business Technology Success Story

Helping those who help others

Calgary organization seeking to improve the quality of life for those living with autism.

The Sinneave Family Foundation (SFF) Provides leadership and innovation in a family- and science -informed, lifespan approach to autism interventions, education and research .

Information Technology is very critical to the success of Sinneave Family Foundation. Like many corporations who rely on their IT systems to provide them with an advantage in the market, SFF leverages their technology to provide top quality services to those they serve.

SFF engaged with Bulletproof InfoTech to design a robust technology solution to meet their core requirements. The needs were no different than most organizations in Calgary. Ensuring the right solution to meet the business needs of the organization was critical combined with ensuring budget requirements were met.

Microsoft Small Business Server 2008, Windows Server 2008 with Terminal Services was the right fit for SFF. With SBS, SFF can easily communicate with staff, share information effectively using Windows SharePoint Services and their confidential information is safeguarded in one central location.

Bulletproof recommended virtualizing the Small Business Server implementation ensuring SFF had another level of data protection, designed to limit their exposure to a serious outage in the event of a system failure. With Hyper-V and Windows Server 2008, SFF has a virtual server solution providing security and stability with their information systems.

Security of all their business information is critical. Ensuring everyone who accesses network resources is actually who they say they are ensures their information is kept secure and in the right hands. Scorpion Software's AuthAnvil and RWWGuard ensures all remote access is secure with the right identity management. SFF knows only those with proper authorization are accessing the organizations information.

SFF has the complete IT solution allowing staff to do their jobs without the headaches of day to day technology support.
